

Contribution Guidelines

We appreciate your interest in contributing to WidePiper! Below are the steps and rules to follow when contributing:

1. Fork the Repository

- Create your own fork of the project by clicking on the *Fork* button at the top of the repository page.

2. Create a Branch

- Make sure to create a feature-specific branch to work on. Branch names should follow the format:
 - ``feature/<feature-name>`` for new features.
 - ``bugfix/<issue-id>`` for bug fixes.

3. Code Quality

- Maintain high code quality and adhere to the project's code style guidelines.
- Follow the naming conventions established in the codebase.
- Avoid unnecessary comments and ensure that your code is well-documented where appropriate.

4. Testing

- Ensure your code includes appropriate tests and that all tests pass before submission.
- Add new test cases if new features or changes are introduced.

5. Commit Messages

- Use meaningful commit messages that describe the changes made.
 - Good example: ``Fixed liquidity calculation for multiple blockchains``
 - Bad example: ``Bug fixed``

6. Pull Request

- Create a pull request (PR) from your feature branch to the ``main`` branch.
- In your pull request, include a brief description of the changes made and the purpose of the feature/bugfix.
- Assign reviewers if necessary.

7. Review and Approval

- Your pull request will be reviewed by the maintainers.
- Be open to feedback and make the requested changes if needed.
- Once all requested changes are made and the maintainers approve, your PR will be merged.

8. Licensing

- By submitting a pull request, you agree that your contribution will be licensed under the same license as the rest of the project (MIT License).

Thank you for helping improve WidePiper!
